PRESS RELEASE

metaphacts acquires SearchHaus and adds smart data search engine GraphScope to its portfolio

Walldorf, Germany, August 22, 2017 – [metaphacts](#), a leading provider of knowledge graph management solutions, today announced the acquisition of [SearchHaus](#), a startup specialized on search solutions for graph data, thus expanding its product portfolio as well as its team. [GraphScope™](#), SearchHaus' signature product, enables users to instantly find precise answers in large data graphs using keyword search. Dr. Daniel Herzig-Sommer, CEO of SearchHaus, will be joining the metaphacts management team as Chief Operating Officer.

“GraphScope delivers ground-breaking innovations in the area of semantic technologies. We are extremely excited to add GraphScope to our product portfolio and to make it available to our customers, and we look forward to have Daniel on board as COO”, commented Dr. Peter Haase, CEO at metaphacts.

Through the SearchHaus acquisition, metaphacts is strategically expanding its product portfolio and bringing SearchHaus' deep search expertise in-house. GraphScope is a smart data search engine for graph data – it translates keyword searches into database queries and delivers precise results, taking into account contextual relationships. This allows customers to satisfy their information needs in seconds and focus on their goals, instead of wasting valuable time searching for the right information.

metaphacts and SearchHaus customers will benefit from an enhanced portfolio for creating and managing knowledge graphs, as GraphScope will be continued and fully integrated into metaphacts' knowledge graph management platform, [metaphactory](#). In the future, the integrated product offering will also be made available to customers as a cloud solution.

“This is an exciting time of opportunity in the world of Smart Data. The SearchHaus team is looking forward to joining forces with metaphacts to help customers leverage the value of their data and reach smarter business decisions. GraphScope is domain-independent and is already used in industries such as life sciences, cultural heritage, and agriculture. It thus fits perfectly into the metaphacts portfolio”, added Dr. Daniel Herzig-Sommer. At metaphacts, Dr. Herzig will be in charge of the technical development of GraphScope and will take over customer-facing and sales-related activities for all metaphacts solutions.

About metaphacts

[metaphacts GmbH](#) aims at empowering customers to build and manage their own knowledge graphs to extract the most value out of their data, enable transparency and, as such, reach smarter business decisions. With this goal, metaphacts provides the expertise, products, and services to create thematically specialized knowledge graphs in areas such as business, finance, life sciences, cultural heritage, and more. metaphacts' end-to-end platform, [metaphactory](#), includes technology for data acquisition and integration, authoring new content, as well as linking to and reusing external knowledge sources. Using the standards-based metaphacts portfolio, custom applications utilizing knowledge graphs can be created much more rapidly. For more information about metaphacts and its solutions please visit www.metaphacts.com

About SearchHaus

[SearchHaus GmbH](#) is a Karlsruhe based startup specialized on structured search solutions. Its software [GraphScope](#) is a graph search engine which enables users to find precise answers in large knowledge graphs without the need to know formal database languages or data schemas. Users enter keyword searches, which are interpreted by GraphScope and translated into database queries.

Customers use GraphScope in the pharma, life-sciences, agricultural and manufacturing industry, to leverage the value of their data.
